2001 COVERAGE LIST

The PsycINFO Coverage List includes journals and other serial publications that are scanned regularly, abstracted selectively, and included in *Psychological Abstracts* (PA), ClinPSYC, and the PsycINFO database. In cases where a journal publishes articles only in a language other than English, the abstracts for these journal articles will be included in ClinPSYC, and PsycINFO database, but will not appear in *Psychological Abstracts*. A dagger (†) after the title indicates this occurrence. For journals that publish articles both in English and in other languages, only the abstracts of the English language articles will be included in PA while both English and non-English language articles will appear in ClinPSYC, and the PsycINFO database.

The presence of a serial title in the list does not imply that all articles contained in issues of that serial will subsequently appear in PsycINFO's databases or print products. Journals likely to publish articles relevant to behavior are included for regular systematic scan of their content. Articles are selected specifically and individually for their relevance to psychology.

Whenever possible, publisher name, address, frequency of publication, and ISSN are included for each publication to facilitate access to original documents by users. The date in parenthesis indicates the publication year of the first issue scanned by PsycINFO of a particular serial. Asterisks within parenthesis indicate that coverage began with the first issue of publication. An N/A after an ISSN indicates that the number was not available. Bold type identifies those journals that published articles appearing in this volume year.

Volume 88 AUTHOR INDEX

à Campo

Adams

This Annual Author Index contains over 100,000 references to the authors and editors of approximately 40,000 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 2001 through December 2001. A companion work, the Annual Subject Index, references these records by topic.

In this volume, all the authors and editors whose work was abstracted or cited in *Psychological Abstracts* for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Entries consist of author name(s), and the *Psychological Abstracts* abstract number under which the entry appeared.

bipolar disorder

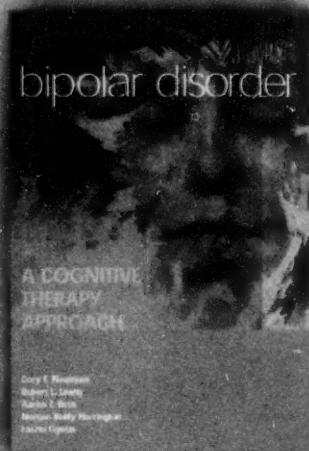

A Cognitive Therapy Approach

Cory F. Newman, Robert L. Lenby, Aaron T. Beck,
Noreen Reilly-Harrington, and Laszlo Gyulai

Bipolar Disorder: A Cognitive Therapy Approach is a rich source book of practical and sensitive guidance on bipolar disorder—a devastating illness that until now has been treated primarily through somatic means. In this book, practitioners will discover the “art and heart” of cognitive therapy in the treatment of bipolar disorder. This volume also examines the interface between cognitive therapy and pharmacotherapy and provides explicit guidelines for addressing bipolar patients’ misgivings about taking medications.

The authors present numerous techniques for the management of hypomania and mania, and they bring to bear the full force of traditional cognitive therapy in combating suicidality—a common aspect of the disorder. Recognizing that bipolar disorder affects entire families, the book explicates methods for helping couples and families collaborate more effectively in the face of one (or more) members’ bipolar illness. In addition, the authors touch upon the sensitive but vitally important topic of stigma, and how it affects the lives and treatment of manic-depressive individuals. Most importantly, this book offers ways for therapists to help boost the morale, self-esteem, hope, and resiliency of their bipolar patients through the therapeutic relationship.
